

WIDE DOOR-TYPE DISHWASHER

PDX PDX-1001JD

POWERFUL
& EFFICIENT

PDX-1001JD is designed to wash large-sized dishware including pots and pans. It has larger dishwasher rack with taller door opening inlet height. This model is recommended for catering capacity of 300 people.

CE

PRODUCT ADVANTAGES

■ Increased Size and Washing Capacity :

PDX-1001JD series are 30% larger than regular door-type. Larger dishwasher rack and increased inlet opening height allows to wash more at once as well as larger size dishware.

■ High Pressure Wash Pump :

Wide door-type dishwasher uses high pressure wash pump. It also uses high quality energy efficient rinse pump for excellent rinse results and maximum overall hygiene.

■ Large Round Window :

Wash and rinse cycles are observable through the large tempered glass window for ensuring dishware hygiene and proper machine operation.

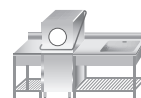

■ 3 Heating Elements (Heaters) :

2 heaters are installed in the wash tank and 1 heater in the rinse tank. This design shortens the overall heating time and allows consecutive wash above 70°C. It also lets the machine momentarily operate even one of the heaters are damaged.

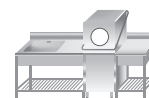

■ Imported Machine Parts :

Essential machine parts are imported from South Korea to ensure high quality machine performance and durability.

Door-Type

PDX-1001JD
Wide Door-Type

Many times we face difficulties with washing large amount of dishwares in limited kitchen space; especially, kitchens that do not have enough space to install a rack conveyor-type dishwasher or door-type dishwasher is simply too small to do all the work. Also, washing large pots and pans by hand requires extra work and longer period of time.

PDX-1001JD is a wide door-type dishwasher that has 30% increased size compared to regular single door-type dishwashers. It also has 90mm taller door inlet opening height and uses 600 x 600 mm customized stainless dishwasher rack for stacking more dishwares. This model is able to meet the all the customer needs above.

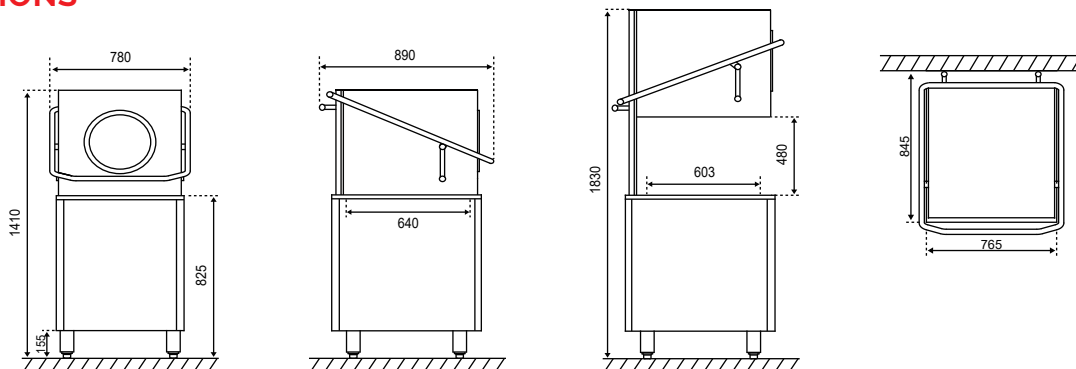

Customized Rack
600 x 600 mm
